# **Treat Dog Dermatitis And Hair Loss With Omega Fish Oils?**

We all love our dogs and occasionally we deal with our dogs just like kids. Shih Tzus are really active and playful dogs just like children and they love it if you give them correct attention. What we don't know is that Shih Tzus may be extremely sensitive with their skin and can have several skin color allergies based on their environment or the food they take. But Shih Tzus are far from the only dogs that suffer from dog dermatitis and hair loss. You'll find times when your experience extreme dermatitis without your realizing prior to eventually leading to hair reduction.

Well do you know that your dog's immunity program is nearly the very same as our system? For instance in cases of heart complications or arthritis, our doctors generally prescribe fish oil for us because it includes omega fatty acids which are very good in lowering the poor cholesterol in our system. The fish oil containing 3 fatty acids also assists in decreasing the inflammation of our joints thus relieving the pain in arthritis. Those things are exactly the same with dogs. It is possible to purchase [Omega Caps ES Liquid](#) that consists of the important fatty acids to relieve the pain from arthritis and decrease the threat of having heart issues like large blood pressure and ventricular arrhythmias.

Arthritis is really typical illness with the aging dogs. This is the inflammation in the joints that result in a incredibly painful sensation. To be able to identify if your dogs has signs of arthritis, try to watch them climb up and go down the stairs or check how they get up following taking a nap. If there is any stiffness seen or any difficulty in walking, then it could be a sign that your dog is experiencing pain on its joint.
